

Pigment Printing Agents

Application

Printing on T-shirts, banner flags, etc.

Characteristics

- Excellent in clarity and fastness
- An abundant of product lineup including binders and various auxiliaries

Representative Products

General binders

Product name	Characteristics / Applications
ER-90(K)	For general purpose (hand-dyed/automatic machine)
G-60	For general purpose (hand-dyed), High color

Concentrated binders

Product name	Characteristics / Applications
705(M)	General pigment printing binder, For general purpose
518	General pigment printing binder, Excellent in fastness
EDC-250	For pad printing
NT-180	Non-turpentine pigment printing binder, Excellent in fastness

Rubber binders

Product name	Characteristics / Applications
LX series	For general purpose, Enabling a gloss finish
LX-M series	For general purpose, Enabling a matte finish
TN series	Excellent in elasticity (based on acrylic resin)
SR series	Excellent in elasticity (based on acrylic urethane resin)
UD series	Excellent in elasticity (based on urethane resin)
ER series	For automatic printing machine

Other binders

Product name	Characteristics / Applications
DH series	For printing on banner flags
VA series	For creating discharge print-tone printed matters
EXA series	For printing on poorly adhesive materials
W series	For automatic printing machine, Enabling slow drying properties
W series	For puff printing
EDC-4N(N)	Excellent in color developability, Enabling a matte finish with a high hiding property
EDC-450	For resist printing using reactive dyes

Auxiliaries

Product name
Thickening / Emulsifying agent
Crosslinking agent
Softening agent
Slow drying agent
Stability improvement agent
Anti-migration agent
