

Pigment Printing Agents

Applications

Printing on T-shirts, banner flags, etc.

Characteristics

- Excellent in clarity and fastness
- We offer an abundant lineup of binders and various auxiliaries.

Representative Products

General binders

Product name	Characteristic / Application
ER-90(K)	For general purpose (hand-dyed/automatic machine)
G-60	For general purpose (hand-dyed), High color

Concentrated binders

Product name	Characteristic / Application
705(M)	For general purpose
518	Excellent in fastness
EDC-250	For pad printing
NT-180	For Non-turpentine printing, Excellent in fastness

Rubber binders

Product name	Characteristic / Application
LX series	For general purpose, Glossy
LX-M series	For general purpose, Matte
TN series	Excellent in elasticity (based on acrylic resin)
SR series	Excellent in elasticity (based on polyurethane/acrylic resin)
UD series	Excellent in elasticity (based on polyurethane resin)
ER series	For automatic machine

Other binders

Product name	Characteristic / Application
DH series	For printing on banner flags
VA series	For creating discharge-printed texture
EXA series	For printing on poorly adhesive materials
W series	For automatic machine, Enabling slow drying properties
EDC-4N(N)	Excellent in color developability, Enabling a matte finish with a high hiding property
EDC-450	For resist printing of reactive dyes

Auxiliaries

Product type
Thickening / Emulsifying agent
Crosslinking agent
Softening agent
Slow drying agent
Stability improvement agent
Anti-migration agent
