

# Permanently dry, moisture-permeable, water-repellent coating for roads and floors

## Applications

- Colored paints for concrete and asphalt floors
- Colored paints for all-weather pavement such as tennis court

## Characteristics

- Acrylic emulsion paint combining excellent lightfastness of inorganic/organic pigments and properties of acrylic resin.
- Over 30 years of sales performance.
- Our paints have a low likelihood of blistering in the coating film due to high moisture permeability. (However, recoating for repairs may cause issues.)
- We offer "Hard type" (hard surface paint) and "Soft type" (soft surface paint). A quick-drying paint is also available as a "Hard type," especially for use during low winter temperatures.

## Representative Products

15 colors in total : 13 standard colors, white, and black.

Colors with \* are produced on order.

## Natural Stone-like Paints

### Applications

- Park walking paths, school routes, shopping street sidewalks, poolside, jogging courses, ferry terminals, etc.
- Painting concrete blocks and cement moldings

### Characteristics

- Color pavement material with a natural stone finish enables designs that harmonize with the surrounding area.
- It is not colored with a single pigment, so the finish is unique.
- Curved surfaces such as sidewalks and curb edges are also finished beautifully.
- Seamless coating is possible, ensuring excellent walkability.
- The finish is finely textured, making the coating slip-resistant even in rainy weather.
- Excellent in weather fastness.

### Evaluation Results

#### ■ Coating performance

Item	Test method	Result
Abrasion resistance	JIS K5665 (CS-17, 9.8N, 1,000 revolutions)	110mg
Acid resistance	JIS K5600 (2% sulfuric acid, 48-hour immersion)	No abnormalities
Alkali resistance	JIS K5600 (Immersion in saturated slaked lime water for 1 month)	No abnormalities
Repeated heating and cooling	JIS A6909 10 cycles	No abnormalities
Accelerated weather fastness	Sunshine Weatherometer 2,000 hours	No abnormalities
	UV tester 200 hours
