

Inorganic Paints for Concrete / Asphalt

Applications

- For areas where moisture permeability is especially required, such as dry riverbeds and flood control basins
- For areas where nonslip properties are required, such as poolside

Characteristics

- Designed as a one-component, water-based type for easy handling.
- Excellent coating properties such as air-/moisture-permeability and durability.
- Excellent nonslip properties effective even on a rainy day.
- Free from blistering when coated on asphalt and concrete.

Representative Products

12 colors in total : 10 standard colors, white, and black.

Construction results

Construction method

[A-1]

Abrasion resistance specification for asphalt and concrete,
Three times coating

[A-3]

Ultra high durability specification for asphalt and concrete,
Four times coating
Using special aggregates, ideal for use with roller skates and
similar activities

[C-5]

Abrasion resistance specification for concrete,
Strong adhesion to concrete, Three times coating
